

Ziqiang Xu

Post-Master Researcher

Ulsan National Institute of Science and Technology(UNIST)

seojagang2002@gmail.com

 github  website

Research Interests

- Artificial Intelligence
- Remote Sensing
- Deep Learning for Computer Vision & Object Detection and Recognition
- NLP & Computer Security (Kali Linux) **Extracurricular Interests*

Education

Kyungpook National University

Mar. 2024 – Mar. 2026

Graduate School, M.S.

Robot and Smart System Engineering & AI-Converged Safety

Daegu, South Korea

GPA: 4.02/4.3

Supervisor: Bubryur Kim

North University of China

Sep. 2019 – Jun. 2023

College of Information and Business, B.S.

Computer Science and Engineering

Jinzhong, China

GPA: 3.35/4.0

Thesis Supervisor: Yingliang Zhao

Academic Experience

Post-Master Researcher

Mar. 2026 – Present

UNIST, Ulsan, South Korea

Supervisor: Jungho Im

Research Intern

Dec. 2025 – Feb. 2026

UNIST, Ulsan, South Korea

Research Assistant Grade 3

Sep. 2025 – Feb. 2026

Kyungpook National University, Daegu, South Korea

BK21 Research Assistant

Mar. 2025 – Aug. 2025

Kyungpook National University, Daegu, South Korea

Research Intern

Nov. 2023 – Mar. 2024

Intelligent Construction Automation Center, Daegu, South Korea

Undergraduate Intern

Jun. 2021 – Jun. 2023

Artificial Intelligence Lab, Jinzhong, China

Publication

1. Satellite-Based Wildfire Monitoring Across the Fire Lifecycle Using Artificial Intelligence: Trends, Challenges, and Future Directions
Accepted (2026)
2. GreenViT: A Vision Transformer with Single-Path Progressive Upsampling for Urban Green-Space Segmentation and Auditable Area Estimation
Accepted (2026)
3. Trustworthy Celestial Eye: Calibrated and Robust Planetary Classification via Self-Supervised Vision Transformers
Accepted (2026)
4. Deep Convolutional Stacked Model for Material Industry Applications: Automated Precise Porosity Assessment Based on CT Imaging
Accepted for presentation (2025)
5. Concrete Structure Crack Classification and Analysis Using Neural Network and Clustering
Accepted (2024)
6. Application of Deep Learning Model Based on ResNet-50 Architecture in Semantic Segmentation of Satellite Images
Accepted for presentation (2024)

Honors & Awards

- 2024–2026 KINGS Scholarship, Kyungpook National University
- Sep. 2025 Research Assistantship Grade 3, Kyungpook National University
- Mar. 2025 BK21 Research Assistantship, Kyungpook National University
- Sep. 2024 Excellence Award, Startup Idea Competition in Integrated Safety Engineering, Graduate School of Convergence Technology in Land and Transport Safety
- Jan. 2024 Merit-based Scholarship, School of Korean Language Education, Kyungpook National University
- 2021-2022 Third Prize, Lanqiao Cup National Software and IT Talent Competition(Python Group), Ministry of Industry and Information Technology of China

Technical Skills

Programming Languages: Python, HTML, CSS

Developer Tools: PyCharm, Visual Studio Code, Cursor

Frameworks / Libraries: PyTorch, Numpy(Pandas), OpenCV(cv2), TensorFlow, Git, LaTeX, Kali Linux

Language Proficiency

- **Chinese:** Native
- **Korean:** Fluent (TOPIK Level 5)
- **English:** Basic proficiency (CET-6)
